ABSTRACT

This document presents data concerned with Illinois higher education. Emphasis is placed on data about current enrollment, enrollment trends, degrees conferred, staff, library resources, student costs, undergraduate transfers, student financial aid, general financial information, and physical space. ## PREFACE

The Illinois Board of Higher Education and its staff through the years have produced a number of analytical studies in support of policy deliberations by the Board and the Illinois higher education community. Unfortunately, much of the information collected through the research process that supported these analytical studies has never been presented in one document. It was felt that such a document would prove useful to decision-makers in the institutions and in governmental agencies, as well as to the legislature and other interested groups and individuals. Thus, the staff of the Board of Higher Education has prepared the following material as the first annual Data Book on Higher Education in Illinois. It provides information in ten broad areas ranging from enrollment to institutional facilities data.

The Data Book was compiled from data provided through various existing surveys and studies completed by each institution. This approach placed a minimal burden on participating institutions. Such an approach, however, increases the difficulty of producing the Data Book and verifying the information contained therein, and thus, increases the "turn-around" time from receipt of information to its accumulation and presentation in the Data Book. During the next year, the Board of Higher Education staff will be investigating with the institutions various methods of formalizing the data collection and verification procedure so that the Data Book can be published at an early date.

Acknowledgement is extended to each public and private college and university in Illinois for their cooperation in providing the information contained herein.

Cameron West  
Executive Director  
Illinois Board of Higher Education

67. Laboratory Utilization at Illinois Public Community Colleges, Fall 1971	173
68. Laboratory Utilization at Illinois Private Colleges and Universities, Fall, 1971	174

## Section I

### Current Enrollment Data

This section presents data on the number and characteristics of students enrolled in Illinois colleges and universities. In Fall 1973, a total of 519,770 students were enrolled in degree credit producing courses in the colleges and universities in Illinois. Of this total, 383,317 students (or 74 percent) were enrolled in public institutions and 136,453 (or 26 percent) were enrolled in private institutions. In addition, 43,910 were enrolled in non-degree credit courses. Of this number, 38,174 (or 86.9 percent) were enrolled in the public community colleges.

The total enrollment figure in this report includes students enrolled in public and private universities, public community colleges, private colleges, private junior colleges, theological schools, private professional schools and other private institutions offering at least the associate of arts or certificate programs. The data does not include the enrollment at the Chicago Skills Center under the jurisdiction of the City Colleges of Chicago.

The following definitions apply to the data reported in this section.

Age. The chronological age of students as of the last day for which fall term registrations or withdrawals are allowed without penalty (normally the tenth day of the term).

Baccalaureate. The public community college instructional program which includes transfer, college parallel, liberal arts and science and baccalaureate-oriented fields of instruction, and refers to those courses classified by HEGIS numbers which are less than 4990, excluding those numbers ending in the --91 to --99 series which are general studies.

Community Education. Those non-credit instructional activities at the public community colleges which under public service have been established to provide an educational service to the various members of the community and are not part of degree or certificate curriculums. Community education includes, but is not limited to, non-credit short-term instructional activity, professional review sessions, workshops, seminars, etc.

Community Service. Those activities at the public community colleges under public service which are concerned with making available to the public various resources and unique capabilities that exist within the institution. Examples of community services may be conferences and institutes, general advisory services and reference bureaus, urban affairs, international affairs, radio and television, consultation, and similar activities which meet the test that the primary intent for establishing is to provide services which are beneficial to groups and individuals outside of the institution.

Degree Credit. Courses creditable toward a bachelor's or higher degree and toward degree programs of less than four years.

Extension. Students taking courses away from a main or branch campus.

Foreign. Students who are other than citizens of the United States of America.

Freshman. Institutional definition - normally those students who have completed fewer than 30 semester hours (45 quarter hours).

Full-time. Students taking twelve or more semester or quarter hours during the semester or quarter. Institutions not on a semester or quarter system reported students taking at least 3/4 of the institutionally defined normal load as full-time students.

Full-time Equivalent Student (FTE). Institutionally defined. Public universities calculate by adding the total number of students carrying 12 or more credit hours and the number obtained by dividing by 12 the total number of all credit hours generated by part-time students. Public community colleges calculate by dividing all credit hours generated at the college by 15 for any term (quarter or semester).

General Studies. The instructional program at the public community colleges which provides the curriculum leading to certificate in the areas defined in the code section below:

Approval has been given to some colleges to award the Associate in General Studies for completion of 60 semester hours or 90 quarter hours in a prescribed "general" curriculum.

Courses in the general studies instruction program may be from any of the disciplines or curriculums and are identified by the last two digits of the HEGIS numbers, --90 through --99.

Codes -

- (01) Developmental Studies, Preparatory Studies or Basic Skills (4999)
- (02) Personal Development (4993)
- (03) Intellectual and Cultural Studies (4996)
- (04) Improving Family Circumstances (2298)

- (05) Homemaking (1398)
- (06) Community and Civic Development (4998)
- (07) Health, Safety and Environmental Studies (4997)
- (08) Development and/or Review of Vocational Skills (4994)

Graduate Student. A student classified as either a Graduate I student, or a Professional student.

Graduate I Student. A student holding a bona fide bachelor's degree who has been admitted to the graduate division either as a candidate for a master's degree, an advanced degree or certificate, or as an unclassified graduate student.

Graduate II Student. A student holding a bona fide master's degree, or advanced degree or certificate beyond the master's degree, who has been admitted to a graduate college or division and who is pursuing courses leading to a doctoral degree. Also, a student holding a bona fide bachelor's degree and who is pursuing courses leading to a doctoral degree and who has attained at least 30 semester credit hours toward a doctoral degree.

Headcount. The number of different, unduplicated individuals enrolled in a term.

Home Study. Students taking degree-credit courses by mail, radio, or television.

In-district. Public community college students who live within the community college district and who attend the community college within that district.

In-state. Students legally domiciled in the State of Illinois.

Junior. Institutionally defined. Normally, those students who have completed fewer than 90 semester hours (135 quarter hours) but at least 60 semester hours (90 quarter hours).

Non-degree Credit. Courses not creditable toward a bachelor's or higher degree or toward a degree program of less than four years.

Occupational. The public community college program which includes business technologies, vocational/career, technical, occupational and career education fields of instruction and refers to those HEGIS numbers greater than 5000.

Off-campus. (See definition of extension.)

On-campus. Students taking courses on a main or branch campus. Living quarters and legal domicile are irrelevant.

Out-of-district. Public Community college students who do not have legal domicile or permanent residence within the boundaries of the community college district where they are enrolled, but within the State of Illinois.

Out-of-state. Students legally domiciled outside the State of Illinois.

Part-time. Students taking less than twelve semester or quarter hours during the semester or quarter. Institutions not on a semester or quarter system reported students taking less than 3/4 of the institutionally-defined normal load as full-time students.

Professional Student. Students enrolled in programs which require at least two academic years of previous college work for entrance and which require a total of at least six academic years of college work for completion.

Race. Refers to the civil rights racial category of students as self-reported or otherwise determined. The categories reported do not correspond to scientific definitions but to racial, ethnic, cultural, color and lingual background of the student. The categories are those used by the Office of Civil Rights and are defined as follows:

- .. Afro-American - Students who identify themselves ethnically as being of Negro, Black or Afro-American descent.
- .. Spanish American - Students who identify themselves as being of Chicano, Mexican American, Puerto Rican, Cuban, Latin American, South Central American, South American, or traditionally Spanish origin.
- .. American Indian - Students who identify themselves as being of Native American Indian descent, including Canadian and Alaskan natives. Does not include Caucasian Americans.
- .. Oriental - Students who identify themselves ethnically as being of Chinese, Japanese, Korean, Hawaiian, Samoan, or Filipino or other Southeast Asian or South Pacific origin.
- .. Caucasian and Other - Students who are not included in any of the other categories. This category includes U.S. native-born Caucasians.

Sophomore. Institutionally defined. Normally those students who have taken fewer than 60 semester hours (90 quarter hours) but at least 30 semester hours (45 quarter hours).

Senior. Institutionally defined. Normally those students who have taken 90 or more semester hours (135 quarter hours) but have not received the Bachelor's degree in the program major in which they are enrolled.

Unclassified Student. Students enrolled in degree credit courses who (a) are not pursuing an associate, bachelor, or higher degree program, or (b) do not fulfill minimum requirements of entrance as regular students. Also included are transfer students and

other individuals who are taking work at an institution whose transcripts have not been completely reviewed and therefore have not been given a student level classification.

Undergraduate Student. Those students who are at the Freshman, Sophomore, Junior or Senior levels.

(1) On campus enrollments are reported for public universities and private institutions. Total degree credit enrollment is reported for public junior colleges.

(2) Breakdown does not include 7,799 students enrolled at Southern Illinois University-Carbondale. Because of reporting inadequacies, these 7,799 students can only be classified as 22-25, 4861; 26-30, 1887; 31 and older, 1051.

Does not include 4600 students in public service programs which were not separated into community education and community service programs.

## CURRENT ENROLLMENT DATA

Table 13 - On Campus Enrollment of Students by Race or National Origin in Illinois by Type of Institution, Fall 1973

RACE OR NATIONAL ORIGIN	PUBLIC SR. INSTITUTIONS Number of Students	% of Total Responding	PUBLIC COMM. COLLEGES(1)		ALL PRIV. INSTITUTIONS Number of Students		TOTAL ALL INSTITUTIONS Number of Students	
			Number of Students	% of Total Responding*	Number of Students	% of Total Responding*	Number of Students	% of Total Responding*

(1) On campus enrollment is reported for public universities and private institutions. Total degree credit enrollment is reported for public community colleges.

(2) Note from Table 16 that the state of residence of 48,396 students at the private institutions is unknown. Some of these students are residents of Illinois. Therefore, a complete county count for the private institutions is not represented in this table.

Section II  
Enrollment Trend Data

This section presents data concerning enrollment trends. For the twentieth consecutive year, Fall term headcount enrollment was greater than that experienced in the previous Fall term. In 1973, 18,273 more students were enrolled in degree credit programs than in Fall, 1972. This represents a 3.6 percent increase. The public community colleges exhibited the greatest increase with 17,113 (or 9.2 percent) more students attending in Fall 1973 than in Fall 1972. Public universities followed with an increase of 2,173 (or 1.2 percent) and private institutions exhibited a drop in enrollment of 1,013 (or 0.7 percent).

While the enrollment in private institutions appears to have somewhat stabilized, it is interesting to note the enrollment shifts by institutional type within the private sector. Although Lewis College became Lewis University during 1973, for this analysis its enrollment is carried with the private colleges. With that clarification, the enrollment trends at the private institutions were as follows:

	<u>Fall 1972</u>	<u>Fall 1973</u>	<u>Change</u>	<u>Percent Change</u>
Private Universities	71,026	70,202	-824	-1.2%
Private Colleges	43,876	42,915	-961	-2.2
Private Junior Colleges	6,762	7,129	367	5.4
Theological Schools	4,424	4,552	128	2.9
Private Professional Schools	3,877	4,383	506	13.1
Other Private Institutions	7,501	7,755	254	3.4

The above analysis indicates that the traditional private colleges and universities continue to experience enrollment declines, while in the Fall 1973 term, there were enrollment increases at the other types of private higher education institutions.

Enrollment patterns by place of residence for the public institutions appear to be relatively stable for the years 1971 through 1973. Out-of-state enrollments were approximately 2.7 to 3.1 percent of the total enrollment at public institutions during that period. While out-of-state enrollments are considerably higher at the private institutions (approximately 20 percent in 1971 and 1972), a considerable number of "no reports" from the private institutions make comparisons impossible for 1973. These "no reports" also make county origin comparisons impossible.

Table 27 indicates student degree credit headcount enrollment by term at the public universities. Term refers to a quarter, semester, trimester, or summer session. An indication of the specific term type each institution follows is given in the table.

Other definitions as presented in Section I apply to this section.

(3) Source of data is: Enrollment in Institutions of Higher Learning in Illinois, Froehlich, G. J.

\* Between 1971 and 1972 there was a change in the definition of Graduate I and Graduate II enrollments so that Graduate II more directly corresponds with those enrolled for the Doctorate degree. Thus, some of the decline in Graduate II enrollment between Fall 1971 and Fall 1972 is due to this definitional change.

### Section III

#### Degrees Conferred Data

This section presents data on the number of degrees conferred by Illinois institutions during the 12 month period ending June 30, 1973. Data reported include certificate, associate, and bachelor or higher degrees as reported by the institutions in their Higher Education General Information Survey (HEGIS) responses. Discipline specialty codes are as described in A Taxonomy of Instructional Programs in Higher Education (Huff, Chandler, 1970).

In absolute numbers, the public institutions conferred more degrees than the private institutions at all levels except for the professional degree. Table 32 details this information by academic discipline.

Public institutions granted more degrees and certificates at all levels except the professional degree (where one less degree was awarded) in 1972-73 than in 1971-72. Private institutions awarded more associate degrees and certificates, professional, and doctorate degrees and fewer bachelor's and master's degrees in 1972-73 than in 1971-72 (see tables 28 and 29).

There were more education degrees produced at the bachelor's (11,292), master's (4,889) and doctorate (386) levels than for any other single discipline. However, fewer education degrees were granted at all levels in 1972-73 than in 1971-72.

At the bachelor's level, the greatest percentage increase in degrees conferred between 1971-72 and 1972-73 was in the Public Affairs discipline. In absolute numbers, the Public Affairs discipline also showed the greatest increase with 560 more degrees being conferred in 1972-73 than in 1971-72. At the associate degree level, Public Service Technologies showed a 103 percent increase with 608 more degrees being conferred in 1972-73 than in 1971-72. However, certificate awards for Public Service Technologies were down between the two years. At the master's and doctorate degree levels, the discipline of Letters with increases of 241 and 65

degrees respectively, demonstrated the greatest absolute increase between 1971-72 and 1972-73. However, the bachelor awards in Letters showed a decline between the two years. Further detail on degrees conferred by discipline can be found in Tables 30 and 31.

Detailed information by sex, academic discipline, and level of degree is shown in Table 33.<sup>1</sup> In general, from this information it can be discerned that as the level of degree increases, the absolute number and percentage of women achieving that degree decreases.

<sup>a</sup> - Decline in degrees granted at Chicago State University is due to a shift of the graduation date beyond the July 1, 1972 reporting date. 661 Bachelor's and 96 Master's degrees were conferred on July 15, 1973.

<sup>b</sup> - Does not include Rockford College.

<sup>c</sup> - Does not include Parks College of Aeronautical Technology of St. Louis University.

DO - Discontinued operation.

- 79 -  
NA - Not available.

## Section IV

### Staff Data

This section deals with faculty and staff in Illinois public universities. Although desirable, comparable information about faculty and staff at public community colleges and private colleges and universities is unavailable at this time.

Table 34 shows the full-time equivalent staffing at Illinois public universities by functional classification for 1972-73. The functional classifications are a slightly modified version of the Program Classification Structure (PCS) as prepared by the National Center for Higher Education Management Systems (NCHEMS). Definitions of the functional classifications are shown below. If further information is required, refer to NCHEMS Technical Report No. 27. For purposes of Table 34, full-time equivalent (FTE) personnel are calculated as follows. For non-academic staff and student employees, a FTE is defined as a person in one position working a 40 hour week for one year. For academic staff, a FTE is defined as a person holding a contract for a period of at least nine months.

Tables 35 through 38 refer to faculty who are involved with the functional classifications of instruction, research, and public service. Those administrators holding faculty rank are excluded from Tables 35 through 38.

Tables 35 through 38 show information about faculty characteristics for Fall, 1973. It should be noted that Governors State University does not assign faculty rank to their faculty members and, therefore, reported all faculty as full professors. Salary range data shown in Tables 37 and 38 are the mid-points of the high and low intervals for faculty salary outlay as reported by the institutions in their FY75 operating budget submissions. Thus, the high and low salary range figures are not actual salaries paid to individual faculty members. However, the average salary paid is an actual average (or mean) since it was calculated by dividing the total salary outlay by the number of faculty paid.

Table 39 shows the full-time equivalent (FTE) faculty assignment for Fall, 1972. Here FTE is based upon institutional definition. Because of the definitional differences, the data in Table 39 should not be compared with that presented in Table 34.

Definitions which apply to this section are as follows.

#### Academic Staff

- .. Administrative Staff - Those persons involved with executive, administrative, and managerial assignments which require primary responsibility for planning, organizing, and directing the institution and its subdivisions.
- .. Faculty - Those persons responsible for teaching and departmental research activities and those with academic rank who are classified as professional under A Manual for Manpower Accounting in Higher Education (Minter, 1971) and who hold academic rank.
- .. Graduate Assistants - Those students enrolled in programs at the Graduate I or Graduate II levels and who receive remuneration for performing services which are classified as instructional or professional under A Manual for Manpower Accounting in Higher Education (Minter, 1971).

Full-time Equivalent - See above discussion on Tables 34 and 39.

#### Functional Categories

- .. Instructional Activities - Those activities which are necessary for the production of outputs eligible for credit in meeting degree or certificate requirements including:
  - a) general academic instruction
  - b) occupational and vocational instruction
  - c) special session instruction
  - d) extension instruction
  - e) departmental research
  - f) audio-visual services
  - g) computing support
  - h) academic administration and personnel development
  - i) course and curriculum development
  - j) admissions, registration, and records
- .. Organized Research Activities - Those research related activities established within an institution under terms of an agreement with agencies external to the institution or separately budgeted and conducted with internal funds including:
  - a) institutes and research centers
  - b) individual or project research
  - c) audio-visual services
  - d) computing support

- .. Public Service Activities - Those activities which produce outcomes directed toward the benefit of the community or individuals within the geographic service area of the institution including:
  - a) community education
  - b) community service
  - c) cooperative extension service
  - d) public service support
- .. Academic Support Activities - Those activities organized to produce direct support to and supplement the mission of the three primary functions of instruction, research, and public service including:
  - a) libraries
  - b) museums and galleries
  - c) ancillary support activities such as teaching hospitals and laboratory schools
- .. Student Service Activities - Those activities related to the support of an institution's student body excluding those activities relating to the instructional activities, but including:
  - a) social and cultural development
  - b) supplemental educational services
  - c) counseling and career services
  - d) financial aid administration
  - e) financial grants-in-aid
  - f) student services support
- .. Institutional Support Activities - Those activities which provide campus-wide support to all other programs including:
  - a) executive management
  - b) fiscal operations
  - c) general administrative services
  - d) logistical support .
  - e) operation and maintenance of physical plant
  - f) faculty and staff services
  - g) community relations
- .. Independent Operations - Those activities which could stand independent of the institution including:
  - a) auxiliary enterprises
  - b) outside agencies

#### Instructional Activity

- .. Direct Instruction - Those activities which apply to time and energy expended in face to face contact with students in a classroom, e.g., a lecture, laboratory, quiz or discussion

group. Also included is instruction on an individual basis (e.g., supervision of Theses and Honors Reading), which may occur in a staff member's office, and instruction via correspondence.

- .. Indirect Instruction - Those instructional activities related to other than direct instruction including:
  - a) paper grading
  - b) course supervision
  - c) academic counseling (other than in an organized unit)
- .. Departmental Research - Those research activities carried on with the institution's regular funds and carried on without specific sponsorship.
- .. Departmental Overheads - Those administrative activities carried out in support of the efficient operation of the department.

Student Employees - Those students enrolled at the institution who receive remuneration for performing services which are classified as other than executive, instructional, and professional under A Manual for Manpower Accounting in Higher Education (Minter, 1971).

Support Staff - Those persons without academic rank who perform professional, technical, clerical, craft and service activities at an institution.

## Section V

### Library Resources Data

This section provides information concerning college and university libraries during 1972-73 as reported by the institutions in their latest Higher Education General Information Survey (HEGIS) responses. Table 40 shows information about units of library resources while Table 41 shows financial information connected with libraries.

Definitions which apply to this section are as follows.

Contributed Staff - Staff in full-time or part-time positions serving without remuneration at religious institutions or institutions with religious affiliations. Volunteer service (if any) at publicly controlled institutions is excluded in this report.

Periodical - A publication issued in parts that usually contain articles by several contributors. It generally has a distinctive title and the successive numbers or parts are intended to appear at stated intervals, usually for an indefinite period.

Regular Staff - Staff in full-time and part-time positions, usually serving with salary contracts.

Volume - A physical unit of any printed, handwritten, mimeographed, or processed work contained in one binding or portfolio, hardbound or paperbound, which has been catalogued, classified, and/or made ready for use.

## Section VI

### Student Cost Data

This section provides information concerning basic student charges at all Illinois colleges and universities. The figures reflect data collected from a number of sources. Information for the public universities reflect 1973-74 charges. Unfortunately, information readily available for the private institutions is from 1972-73. Thus, there may have been some increases at the private institutions which are unreported in this data.

The student charges for public universities and private institutions (Table 42) are calculated on an annual basis for full-time students for the regular academic year excluding summer sessions. Student tuition charges for public community colleges (Table 43) are shown on a per credit hour basis. For comparison purposes, an annual load of 30 credit hours for a full-time community college student could be assumed.

It should be pointed out that the reported charges do not constitute the total cost of achieving an education. Not reported in this data are costs for transportation, laundry, recreation, and other items.

## Section VII

### Undergraduate Transfer Data

This section concerns undergraduate transfers to Illinois colleges and universities from within the State and from other states. Information about transfers from Illinois institutions to institutions in other states is not available.

Table 45 shows the flow of transfers between and within each of three types of institutions (public universities, private colleges and universities, and public community colleges) and from institutions in other states for the Fall terms in 1971, 1972, and 1973. Unfortunately, fewer institutions reported this data with each succeeding year (88 percent response in 1971 vs. a 74 percent response in 1973). Even with fewer institutions reporting each year, the number of transfer students reported showed an increase indicating that the total number of transfer students has increased since 1971.

Analysis of the 1973 data presented in Table 45 indicates that 10,833 students transferred out of the community colleges into the public universities and private institutions. However, 8,384 students transferred from public universities and private institutions into the public community colleges, leaving the community colleges with a net outflow of 2,439 students. Similarly, 4,933 students transferred from private institutions into public universities and community colleges. But, 2,288 community college students and 815 public university students transferred into the private institutions, leaving the private institutions with a net outflow of 1,830 students. Only the public universities had a net inflow of students (4,269). The public universities received about twice as many transfers from private institutions as they sent to private institutions (1,768 from vs. 815 to private institutions) and 3,316 more transfers from community colleges as they sent to community colleges (8,535 from vs. 5,219 to community colleges).

Table 47 shows the number of transfer students by level for the three types of institutions. While the private institutions show a higher percentage of unclassified students, the remaining pattern for class level appears similar for the public universities and private senior colleges and universities. The largest number of transfers occur at the junior and sophomore levels for these institutions. For the community colleges more than twice as many freshmen as sophomores are received as transfer students.

No definitions beyond those presented in earlier sections are needed for interpretation of information presented in this section.

## UNDERGRADUATE TRANSFER DATA

Table 45 - Number of Transfers to Illinois Colleges and Universities, Fall 1971 to Fall 1973

Type of Institution	Fall (1) 1971		Fall 1972 (2)		Fall 1973 (3)

## Section VIII

### Student Financial Aid Data

This section presents information concerning student financial aid at Illinois colleges and universities for the twelve month period ending June 30, 1973. The information shown in Tables 48 through 56 was summarized from a survey conducted during the Fall 1972. Since it was a Fall survey, estimates were given for the annual amounts of student aid. It is not felt that these estimates will vary significantly from the actual annual amounts of financial aid.

A total of \$237.3 million was estimated as the level of student financial aid for 1972-73. This financial aid consisted of scholarships (42.6%), employment (24.8%), loans (20.9%) and tuition waivers (11.7%).

Students enrolled at public universities received \$117.0 million (49%) of the total financial aid distributed in 1972-73. Of this amount, \$39.4 million was received from institutional sources with \$28.4 million distributed through institutional employment programs and \$7.8 million granted through institutional tuition waivers. The State contributed portion of the \$117.0 million was \$36.8 million. Of this, the Illinois State Scholarships of \$19.0 million were awarded and tuition waivers. The State contributed portion of the \$117.0 million was \$36.8 million. Of this, the Illinois State Scholarships amounting to \$19.0 million were awarded and statutory tuition waivers accounted for \$13.2 million. Federal sources contributed \$23.5 million.

Students enrolled at private institutions received \$100.5 million (42%) of the total financial aid distributed in 1972-73. Of this amount, \$34.2 million was received from institutional sources with the largest amount coming from institutional scholarships (\$22.1 million) and the next largest amount coming from institutional employment (\$8.2 million). The State contributed portion of the \$100.5 million was \$25.4 million with the Illinois State Scholarship awards accounting for \$24.1 million. Federal sources contributed \$29.2 million.

Students enrolled at public community colleges received \$19.8 million in financial aid with the largest portion (\$8.7 million) coming from Federal sources. The State contributed portion was \$7.3 million with statutory tuition waivers accounting for \$3.6 million and Illinois State Scholarship awards, \$2.0 million.

Table 57 shows a three year analysis (1970-71 to 1972-73) of Illinois State Scholarship awards by institution. The total number of award winners as a percentage of Fall enrollment has increased for the public universities and community colleges and the private universities, colleges and junior colleges. Theological schools and private professional schools have shown a decrease in this percentage. The average award per recipient is also up for these three years for all types of institutions except private junior colleges.

## STUDENT FINANCIAL AID DATA

Section IX  
Financial Data

This section presents information on operating appropriations and expenditures for the public universities. Data in a comparable format is not included for private institutions and the public community colleges.

Operating expenditures are broken down in Table 58 according to the functional classification scheme as described in Section IV. Note that operating expenditures in Table 58 will not compare to appropriations as shown in Table 59, since expenditures from all sources of funds are shown in Table 58.

Table 59 shows the historical record of State operating appropriations. It should be noted that the "income fund" is appropriated in Illinois. The income fund consists of institutional income from tuition, extension fees, application fees, interest on certain investments, etc., with the income from tuition and extension fees making up approximately 95 percent of the total fund. Appropriations from the income fund have increased from approximately 8 percent of the total operating appropriation in FY70 to approximately 14 percent in FY74.

## Section X

### Space Data

This section presents data on space and space utilization at Illinois public and private colleges and universities as collected through the biennial Statewide Space Survey.

Different institutional programs and purposes generate different combinations of space requirements among institutions. Some evidence of this can be seen from the percent distribution by room type in Tables 60, 61 and 62. Further, utilization of facilities varies according to the nature of the activity which takes place within the facilities. Generally, instructional, research, and service functions generate different space requirements and utilization. Institutions with different emphases on these three functions generate different utilization patterns. Some evidence of this can be seen from the classroom and laboratory utilizations as shown in Tables 63 through 68.

Data elements for this study are as defined in the Higher Education Facilities Classification and Inventory Procedures Manual (OE 51016, OSSO and Roberts, 1968) as modified. Pertinent definitions with modifications are as follows.

Gross Square Feet (GSF) - The sum of the floor areas included within the outside faces of exterior walls for all stories, or areas, which have floor surfaces.

Net Assignable Square Feet (NASF) - The sum of all areas on all floors of a building assigned to, or available for assignment to an occupant.

Room Type - As defined in OE 51016 with the following departures:

- .. conference rooms used for 15 or more weekly room hours of scheduled instruction is included with classrooms
- .. conference rooms in conference centers, student centers, etc. are classified in the General Use category
- .. only study facilities under the administration of the Director of Libraries are reported under the Study category

.. laboratory school space primarily concerned with public education requirements for grades K through 12 is classified in the Demonstration category. Other laboratory school space is assigned to its appropriate category, e.g., offices

Station - A chair, seat, laboratory desk, or some other facility necessary to accommodate one student during an instructional period.

Weekly Room Hours - The unit of time for which classes meet for scheduled instruction. Generally, a weekly room hour consists of 50 minutes with a ten minute allowance for change of classes.
